Digital character production, 3-d avatars, and virtual accessories are designed and purchased on the CyberSex.com website using the latest stable diffusion technology. These digital characters are unique creations that become registered on the blockchain as NFTs. They are highly customizable enabling users to create muscle-bound studs, a sex dungeon dominatrix, and more. The character designs are limited only by the imagination of their creators and can be used within the CyberSex.com virtual environments. They can be sold and or traded as digital art within the Cyber Sex community and beyond.

Currently, there are several interactive sex toys on the market that simulate male and female genitalia and offer various forms of stimulation. It is probable that these devices will continue to become more advanced and will soon incorporate features such as simulated orgasms with fluid release.

The market for sex toys is estimated to be 33.1 billion USD in 2020 and continues to grow. With a projected compound annual growth rate (CAGR) of 8.7% from 2021 to 2028. Accordingly, the revenue potential for Cyber Sex technology is expected to increase exponentially. With the increasing acceptance and popularity of interactive sexual wellness products and VR technology, the overall potential for growth in this market is significant.
